## FLANGE LOCK

- Avoid lost production, valve replacement, wellhead workover
- Controlled access using McGard's patented keys
- Easily retro-fitted to existing valves
- Produced from high-strength alloy steel
- Selectively hardened for strength and durability
- Proven high-security for both bolted and studded connections

## PLUG LOCK

- Controlled access using McGard's patented keys registered to authorized individuals
- Threads into any female threaded connection
- Fits slightly recessed for added security
- No moving parts to jam or corrode
- Produced from high-strength through-hardened alloy steel
- Proven high security
- Available in 1/2", 3/4", 1", 1-1/4", 1-1/2", and 2" diameters

## SECURITY FASTENERS

- Security for screw or bolt mounted equipment
- Ideal for prisons or any other installation demanding high security
- Controlled access using registered keys
- Completely reusable
- Can be used on a variety of different applications
- Virtually impossible to defeat with strong-arm tools
- Unique design, made of alloy and stainless steel with computer generated locking patterns
- A large selection of U.S. standard and metric sizes available, please contact us for specific sizes and pricing

## OPEN HOLE NUTS

- Security for any stud mounted equipment
- Controlled access using McGard's registered keys
- Made of alloy steel and selectively hardened to resist attack from strong arm tools
- Tapered head design is virtually impossible to grip

# The Intimidator®

Line Of Security Products

McGard's Intimidator™ line of security products is a family of security locks that are superior to any other mechanical theft device on the market. The McGard locking pattern technology is unique in the industry. Intimidator security products meet a wide variety of security needs, from the simplest theft prevention requirement to the highest security situation. The McGard Quality Management System is ISO 9001 certified and all our products are designed and manufactured by McGard in the USA.
