Line Of Security Products

McGard's Intimidator™ line of security products is a family of security locks that are superior to any other mechanical theft device on the market. The McGard locking pattern technology is unique in the industry. Intimidator security products meet a wide variety of security needs, from the simplest theft prevention requirement to the highest security situation. The McGard Quality Management System is ISO 9001 certified and all our products are designed and manufactured by McGard in the USA.

## Viper Lock

- Protects against meter tampering & theft of service
- No modifications needed
- Easily installed in seconds in the field
- Uses the same key as our Electric Industry Locks
- Can be installed on gas or water valves

## Valve Lock

- Protects against meter tampering & theft of service
- No modifications needed
- Easily installed
- Unique two piece design attaches around the shut-off valve with one security lock
- When installed properly, the valve lock totally encloses the valve and protects against unauthorized turn on

## Plug Lock

- Super tough stainless steel for optimum corrosion resistance
- 100% lead free material
- Easy installation
- Maintenance free, one-piece construction
- Locks into standard NPT and coupling threads
- Recessed installation design for superior theft and tampering prevention
- Key tools from McGard available ONLY to authorized personnel
- Computerized key patterns registered to every enduser for complete security
- Common sizes available: 3/4", 1", 1-1/4". Custom sizes upon request

## Meter Security Screws

- Protects against meter tampering & theft of service
- No modifications needed
- Adaptable to virtually all meters
- Installed easily in the field or at the factory
- Security screws available with or without thread lock
- Virtually impossible to defeat with strong arm tools
- Completely reusable
